

# Comberton Primary School Mathematics Curriculum

#### **Our Vision**

Our role at Comberton is to spark curiosity, creating a world of opportunity, awe and wonder for our children and staff. We aim to equip our children with the knowledge, skills and values to lead productive, healthy and inspired lives in modern day Britain.

#### **Subject Intent**

At Comberton Primary school we aim to provide a highly effective maths curriculum that develops a deep understanding of mathematical concepts through a range of rich and challenging problems. We believe that maths is essential to everyday life, is critical to understanding Science, Technology and Engineering and also necessary for secure financial literacy. We want our children to enjoy the awe and wonder of Mathematics as well as allowing them to build strong foundations for their future lives and careers.

We strive for our pupils to develop a secure foundation of knowledge and skills, as well as the confidence to apply their learning in a range of contexts, so that they have a understanding which allows them to be curious about the mathematical world around them. At the heart of this is the expectation that at Comberton all pupils will have the opportunity to achieve success, so that disadvantaged pupils and those with special educational needs and disabilities will be fully supported to achieve this.

Through the use of structured lessons, which build upon carefully sequenced small steps, caters for all pupils, and takes into consideration individual learning needs and starting points, **our children will leave Comberton with**:

- a fluency in the fundamentals of mathematics, and be able to recall and apply their knowledge rapidly and accurately during both retrieval practice and their daily lessons.
- a conceptual understanding through Concrete, Pictorial and Abstract Learning. Children will engage with a varied range of concrete manipulatives, pictorial representations and abstract questioning.
- strategies to reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and develop an argument, justification or proof using mathematical language.
- an appreciation of number and number operations, which enables mental calculations and written procedures to be performed efficiently, fluently and accurately.
- positive and resilient attitudes towards mathematics by receiving a sustained level of challenge through high-quality activities.

#### **National Curriculum Overview**

EYFS includes non-statutory 'Early Learning Goals' in italics.

Concept/Area	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Counting	Verbally count beyond 20, recognising the pattern of the counting system  Subitise (recognise quantities without counting) up to 5	count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number			count backwards through zero to include negative numbers	interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero	use negative numbers in context, and calculate intervals across zero
		count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens	count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward	count from 0 in multiples of 4, 8, 50 and 100;	count in multiples of 6, 7, 9, 25 and 1000	count forwards or backwards in steps of powers of 10 for any given number up to 1000000	
		given a number, identify one more and one less		find 10 or 100 more or less than a given number	find 1000 more or less than a given number		
Comparing Numbers		use the language of: equal to, more than, less than (fewer), most, least	compare and order numbers from 0 up to 100; use <, > and = signs	compare and order numbers up to 1000	order and compare numbers beyond 1000	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit	read, write, order and compare numbers up to 10 000000 and determine the value of each digit
Reading and Writing number	Link the number symbol (numeral) with its cardinal number value	read and write numbers from 1 to 20 in numerals and words.	read and write numbers to at least 100 in numerals and in words	read and write numbers up to 1000 in numerals and in words		read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit
				tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks	read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.	read Roman numerals to 1000 (M) and recognise years written in Roman numerals.	
Understanding Place Value	have a deep understanding of number to 10, including the composition of each number		recognise the place value of each digit in a two- digit number (tens, ones)	recognise the place value of each digit in a three- digit number (hundreds, tens, ones)	recognise the place value of each digit in a four- digit number (thousands, hundreds, tens, and ones)	read, write, order and compare numbers to at least 1000000 and determine the value of each digit	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit
					find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places

Rounding					round any number to the	round any number up to	round any whole number
					nearest 10, 100 or 1000	1000000 to the nearest 10, 100, 1000, 10 000 and 100 000	to a required degree of accuracy
Addition and Subtraction	recall number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.	represent and use number bonds and related subtraction facts within 20	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
	Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity	add and subtract one- digit and two-digit numbers to 20, including zero	add and subtract numbers using concrete objects, pictorial representations, and mentally, including: * a two-digit number and ones * a two-digit number and tens * two two-digit numbers * adding three one- digit numbers	add and subtract numbers mentally, including:  * a three-digit number and ones  * a three-digit number and tens  * a three-digit number and tens		add and subtract numbers mentally with increasingly large numbers	perform mental calculations, including with mixed operations and large numbers
			show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot				use their knowledge of the order of operations to carry out calculations involving the four operations
Addition and subtraction Formal Methods		read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs		add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)	
			recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems	estimate the answer to a calculation and use inverse operations to check answers	estimate and use inverse operations to check answers to a calculation	use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy
Multiplication and Division	Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally		recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers	recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables	recall multiplication and division facts for multiplication tables up to 12 × 12		

	chanthat multipliation		uso place value lengues	multiply and divide	perform mental
	show that multiplication		use place value, known		•
	of two numbers can be		and derived facts to	numbers mentally	calculations, including
	done in any order		multiply and divide	drawing upon known	with mixed operations
	(commutative) and		mentally, including:	facts	and large numbers
	division of one number		multiplying by 0 and 1;		
	by another cannot		dividing by 1; multiplying		
			together three numbers	10:1	
	calculate mathematical		recognise and use factor	multiply and divide whole	
	statements for		pairs and commutativity	numbers and those	
	multiplication and division within the		in mental calculations	involving decimals by 10, 100 and 1000	
				100 and 1000	
	multiplication tables and				
	write them using the multiplication (x), division				
	(÷) and equals (=) signs				
Multiplication and	(=) and equals (=) signs	write and calculate	multiply two-digit and	multiply numbers up to 4	multiply multi-digit
Division		mathematical statements	three-digit numbers by a	digits by a one- or two-	numbers up to 4 digits by
Formal Methods		for multiplication and	one-digit number using	digit number using a	a two-digit whole number
		division using the	formal written layout	formal written method,	using the formal written
		multiplication tables that	Torrital Writter layout	including long	method of long
		they know, including for		multiplication for two-	multiplication
		two-digit numbers times		digit numbers	matapheation
		one-digit numbers, using		algic Hambers	
		mental and progressing			
		to formal written			
		methods			
		methods		divide numbers up to 4	divide numbers up to 4-
				digits by a one-digit	digits by a two-digit
				number using the formal	whole number using the
				written method of short	formal written method of
				division and interpret	short division where
				remainders appropriately	appropriate for the
				for the context	context divide numbers
					up to 4 digits by a two-
					digit whole number using
					the formal written
					method of long division,
					and interpret remainders
					as whole number
					remainders, fractions, or
					by rounding, as
					appropriate for the
					context
				identify multiples and	identify common factors,
				factors, including finding	common multiples and

	write simple fractions e.g.	recognise and show,	recognise and show,	identify, name and write	use common factors to
	$\frac{1}{2}$ of 6 = 3 and recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$ .	using diagrams, equivalent fractions with small denominators	using diagrams, families of common equivalent fractions	equivalent fractions of a given fraction, represented visually, including tenths and hundredths	simplify fractions; use common multiples to express fractions in the same denomination
			recognise and write decimal equivalents of any number of tenths or hundredths	read and write decimal numbers as fractions (e.g. $0.71 = \frac{71}{100}$ )	associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g.
				recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	
			recognise and write decimal equivalents to	recognise the per cent symbol (%) and understand that per cent relates to "number of parts per hundred", and write percentages as a fraction with denominator 100 as a decimal fraction	recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.
Add and subtract fractions		add and subtract fractions with the same denominator within one whole (e.g. $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$ )	add and subtract fractions with the same denominator	add and subtract fractions with the same denominator and multiples of the same number	add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions
				recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number (e.g. $^{2}/_{5}$ + $^{4}/_{5}$ = $^{6}/_{5}$ = $^{1}/_{5}$ )	
Multiply Fractions				multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams	multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$ )
					multiply one-digit numbers with up to two

			1	1		1	T
							decimal places by whole numbers
							divide proper fractions by
							whole numbers (e.g. $^{1}/_{3}$ ÷
							2 = 1/6)
Multiplying decimals							multiply one-digit numbers with up to two decimal places by whole numbers
					find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths		multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places
							identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places
							associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. <sup>3</sup> / <sub>8</sub> )
							use written division methods in cases where the answer has up to two decimal places
Measurement	Compare length, weight and capacity	compare, describe and solve practical problems for:  * lengths and heights [e.g. long/short, longer/shorter, tall/short, double/half]  * mass/weight [e.g. heavy/light, heavier than, lighter than]  * capacity and volume [e.g. full/empty, more than, less	compare and order lengths, mass, volume/capacity and record the results using >, < and =		estimate, compare and calculate different measures, including money in pounds and pence	calculate and compare the area of squares and rectangles including using standard units, square centimetres (cm <sup>2</sup> ) and square metres (m <sup>2</sup> ) and estimate the area of irregular shapes	calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm³) and cubic metres (m³) and extending to other units such as mm³ and km³.

	I	1	1	1	I	1
	than, half, half full, quarter] * time [e.g. quicker, slower, earlier, later]					
Volume	siower, earlier, laterj				estimate volume (e.g. using 1 cm <sup>3</sup> blocks to build cubes and cuboids) and capacity (e.g. using water)	
Sequencing	sequence events in chronological order using language [e.g. before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening]	compare and sequence intervals of time	compare durations of events, for example to calculate the time taken by particular events or tasks			
	measure and begin to record the following:  * lengths and heights * mass/weight * capacity and volume * time (hours, minutes, seconds)	choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels	measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (I/mI)	estimate, compare and calculate different measures, including money in pounds and pence (appears also in Comparing)	use all four operations to solve problems involving measure (e.g. length, mass, volume, money) using decimal notation including scaling.	
Perimeter			measure the <b>perimeter</b> of simple 2-D shapes	measure and calculate the <b>perimeter</b> of a rectilinear figure (including squares) in centimetres and metres	measure and calculate the <b>perimeter</b> of composite rectilinear shapes in centimetres and metres	recognise that shapes with the same areas can have different <b>perimeters</b> and vice versa
Area				find the area of rectilinear shapes by counting squares	calculate and compare the area of squares and rectangles including using standard units, square centimetres (cm²) and square metres (m²) and estimate the area of irregular shapes	calculate the area of parallelograms and triangles
						calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm 3) and cubic metres (m 3), and extending to other units [e.g. mm 3 and km 3].

						recognise when it is possible to use formulae for area and volume of shapes
Money	recognise and know the value of different denominations of coins and notes	recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value	add and subtract amounts of money to give change, using both £ and p in practical contexts			
		find different combinations of coins that equal the same amounts of money				
		solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change				
Time	tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.	tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times.	tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks	read, write and convert time between analogue and digital 12 and 24- hour clocks		
	recognise and use language relating to dates, including days of the week, weeks, months and years	know the number of minutes in an hour and the number of hours in a day.	estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as a.m./p.m., morning, afternoon, noon and midnight	solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days	solve problems involving converting between units of time	
Converting units of measure			know the number of seconds in a minute and the number of days in each month, year and leap year	convert between different units of measure (e.g. kilometre to metre; hour to minute)	convert between different units of metric measure (e.g. kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)	use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places
					understand and use equivalences between metric units and common imperial units such as inches, pounds and pints	convert between miles and kilometres

Geometry – properties of shape	Select, rotate and manipulate shapes to develop spatial reasoning skills	recognise and name common 2-D and 3-D shapes, including:  * 2-D shapes [e.g. rectangles (including squares), circles and triangles]  * 3-D shapes [e.g. cuboids (including cubes), pyramids and spheres].	identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line		identify lines of symmetry in 2-D shapes presented in different orientations	identify 3-D shapes, including cubes and other cuboids, from 2-D representations	recognise, describe and build simple 3-D shapes, including making nets
	Compose and decompose shapes so that children can recognise a shape can have other shapes within it, just as numbers can.		identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces				illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius
			Identify 2-D shapes on the surface of 3-D shapes, (for example, a circle on a cylinder and a triangle on a pyramid)	draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them	complete a simple symmetric figure with respect to a specific line of symmetry	draw given angles, and measure them in degrees (°)	draw 2-D shapes using given dimensions and angles
			compare and sort common 2-D and 3-D shapes and everyday objects		compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes	use the properties of rectangles to deduce related facts and find missing lengths and angles	compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons
						distinguish between regular and irregular polygons based on reasoning about equal sides and angles	
Geometry: Position and Direction				recognise angles as a property of shape or a description of a turn		know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles	
Angles				identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle	identify acute and obtuse angles and compare and order angles up to two right angles by size	identify:  * angles at a point and one whole turn (total 360°)  * angles at a point on a straight line and ½ a turn (total 180°)  * other multiples of 90°	recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles

	T		1	1	1	, , , , , , , , , , , , , , , , , , , ,
			identify horizontal and			
			vertical lines and pairs of			
			perpendicular and			
			parallel lines			
Position and Direction	describe position,	use mathematical		describe positions on a	identify, describe and	describe positions on the
	direction and movement,	vocabulary to describe		2-D grid as coordinates in	represent the position of	full coordinate grid (all
	including half, quarter	position, direction and		the first quadrant	a shape following a	four quadrants)
	and three-quarter turns.	movement including			reflection or translation,	' '

#### **Assessment**

#### **Mathematics** End of Year Assessment Statements

Number & Place Value	Number Facts	Addition & Subtraction	Multiplication & Division
Talk about parts that make up a whole number to 10.	Recite Numbers up to 50.	Recall number facts from 0-5 and recall some number bonds to 10.	Share amounts between groups of 2, 3 and 4 and say whether these have been shared fairly or not.
Compare two quantities and say when one is greater than, less than or has the same as the other quantity.			Recall some doubling facts within 10.

<u>Mathematics</u> **End of Year Assessment Statements** 

Children in year one are able to use equipment to help them achieve these end of year assessment statements.

Number & Place Value	Number Facts	Addition & Subtraction	Multiplication & Division	Fractions
Count within 100, forwards and backwards, starting with any number.	Develop fluency in addition and subtraction facts within 10.	Compose numbers to 10 from 2 parts, and partition numbers to 10 into parts, including recognising odd and even numbers.	Recognise equal groups and know how many are in each group.	Recognise, find and name a half as one of two equal parts of an object, shape or quantity
Reason about the location of numbers to 20 within the linear number system, including comparing using < > and =	Count forwards and backwards in multiples of 2, 5 and 10, up to 10 multiples, beginning with any multiple, and count forwards and backwards through the odd numbers.	Read, write and interpret equations containing addition (+), subtraction (-) and equals (=) symbols, and relate additive expressions and equations to real-life contexts.		Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity

## Mathematics End of Year Assessment Statements Year 2

Number & Place Value	Number Facts	Addition & Subtraction	Multiplication & Division	Fractions
Recognise the place value of each digit in two-digit numbers, and compose and decompose two-digit numbers using standard and non-standard partitioning.	Secure fluency in addition and subtraction facts within 10, through continued practice.	Add and subtract across 10	Recognise repeated addition contexts, representing them with multiplication equations and calculating the product, within the 2, 5 and 10 multiplication tables.	Recognise, find and name fractions which represent 1 or several parts of a whole that is divided into equal parts.
Reason about the location of any twodigit number in the linear number system, including identifying the previous and next multiple of 10.		Recognise the subtraction structure of 'difference' and answer questions of the form, "How many more?".	Relate grouping problems where the number of groups is unknown to multiplication equations with a missing factor, and to division equations (quotitive division)	
		Add and subtract within 100 by applying related onedigit addition and subtraction facts: add and subtract only ones or only tens to/from a two-digit number.		
		Add and subtract within 100 by applying related onedigit addition and subtraction facts: add and subtract any 2 twodigit numbers.		

<u> </u>				
Number & Place Value	Number Facts	Addition & Subtraction	Multiplication & Division	Fractions
Know that 10 tens are equivalent to 1 hundred, and that 100 is 10 times the size of 10; apply this to identify and work out how many 10s there are in other three-digit multiples of 10.	Secure fluency in addition and subtraction facts that bridge 10, through continued practice.	Calculate complements to 100, for example: 46 + ? = 100	Apply known multiplication and division facts to solve contextual problems with different structures, including quotitive and partitive division.	Interpret and write proper fractions to represent 1 or several parts of a whole that is divided into equal parts.
Recognise the place value of each digit in three-digit numbers, and compose and decompose three-digit numbers using standard and non-standard partitioning.	Recall multiplication facts, and corresponding division facts, in the 10, 5, 2, 4 and 8 multiplication tables, and recognise products in these multiplication tables as multiples of the corresponding number.	Add and subtract up to three- digit numbers using columnar methods.		Find unit fractions of quantities using known division facts (multiplication tables fluency).
Reason about the location of any three- digit number in the linear number system, including identifying the previous and next multiple of 100 and 10.	Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 10)	Manipulate the additive relationship: Understand the inverse relationship between addition and subtraction, and how both relate to the part—part—whole structure. Understand and use the commutative property of addition, and understand the related property for subtraction.		Reason about the location of any fraction within 1 in the linear number system.
Divide 100 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in multiples of 100 with 2, 4, 5 and 10 equal parts.				Add and subtract fractions with the same denominator, within 1.

# Mathematics End of Year Assessment Statements Year 5

				I =
Number & Place Value	Number Facts	Addition & Subtraction	Multiplication & Division	Fractions
Know that 10 tenths are equivalent to 1 one, and that 1 is 10 times the size of 0.1. Know that 100 hundredths are equivalent to 1 one, and that 1 is 100 times the size of 0.01. Know that 10 hundredths are equivalent to 1 tenth, and that 0.1 is 10 times the size of 0.01.	Secure fluency in multiplication table facts, and corresponding division facts, through continued practice.	Add and subtract whole numbers with more than 4 digits, including using formal written methods of columnar addition and subtraction, where appropriate estimating and using inverse operations to check answers to a calculation.	Multiply and divide numbers by 10 and 100; understand this as equivalent to making a number 10 or 100 times the size, or 1 tenth or 1 hundredth times the size.	Find non-unit fractions of quantities.
Recognise the place value of each digit in numbers with up to 2 decimal places, and compose and decompose numbers with up to 2 decimal places using standard and nonstandard partitioning.	Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 1 tenth or 1 hundredth).	Add and subtract numbers mentally with increasingly larger numbers	Find factors and multiples of positive whole numbers, including common factors and common multiples, and express a given number as a product of 2 or 3 factors.	Find equivalent fractions and understand that they have the same value and the same position in the linear number system
Reason about the location of any number with up to 2 decimals places in the linear number system, including identifying the previous and next multiple of 1 and 0.1 and rounding to the nearest of each.			Multiply any whole number with up to 4 digits by any one-digit number using a formal written method.	Recall decimal fraction equivalents for 1/2, ½, 1/5 and 1/10 and for multiples of these proper fractions.
Divide 1 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in units of 1 with 2, 4, 5 and 10 equal parts.			Divide a number with up to 4 digits by a one-digit number using a formal written method, and interpret remainders appropriately for the context.	
Convert between units of measure, including using common decimals and fractions.				

# RIMARY Endow. Mathematics End of Year Assessment Statements Year 4

Number & Place Value	Number Facts	Addition & Subtraction	Multiplication & Division	Fractions
Know that 10 hundreds are equivalent to 1 thousand, and that 1,000 is 10 times the size of 100; apply this to identify and work out how many 100s there are in other four-digit multiples of 100.	Recall multiplication and division facts up to 12 x 12, and recognise products in multiplication tables as multiples of the corresponding number.	Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction, where appropriate estimating and using inverse operations to check answers to a calculation.	Multiply two-digit and three-digit numbers by a one-digit number using formal written layout	Reason about the location of mixed numbers in the linear number system.
Recognise the place value of each digit in four-digit numbers, and compose and decompose four-digit numbers using standard and nonstandard partitioning.	Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 100)		Solve division problems, with two- digit dividends and one-digit divisors, that involve remainders.	Convert mixed numbers to improper fractions and vice versa.
Reason about the location of any four-digit number in the linear number system, including identifying the previous and next multiple of 1,000 and 100, and rounding to the nearest of each.			Multiply and divide whole numbers by 10 and 100 (keeping to whole number quotients); understand this as equivalent to making a number 10 or 100 times the size.	Add and subtract improper and mixed fractions with the same denominator, including bridging whole numbers.
Divide 1,000 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in multiples of 1,000 with 2, 4, 5 and 10 equal parts.			Manipulate multiplication and division equations, and understand and apply the commutative property of multiplication.	
			Understand and apply the distributive property of multiplication.	

# Mathematics End of Year Assessment Statements Year 6

Number & Place Value	Number Facts	Addition & Subtraction	Multiplication & Division	Fractions
Understand the relationship between powers of 10 from 1 hundredth to 10 million, and use this to make a given number 10, 100, 1,000, 1 tenth, 1 hundredth or 1 thousandth times the size (multiply and divide by 10, 100 and 1,000)	Recall and use equivalences between simple fractions, decimals and percentages.	Understand that 2 numbers can be related additively or multiplicatively, and quantify additive and multiplicative relationships (multiplicative relationships restricted to multiplication by a whole number).	Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication.	Recognise when fractions can be simplified, and use common factors to simplify fractions.
Recognise the place value of each digit in numbers up to 10 million, including decimal fractions, and compose and decompose numbers up to 10 million using standard and nonstandard partitioning.		Use a given additive or multiplicative calculation to derive or complete a related calculation, using arithmetic properties, inverse relationships, and place- value understanding.	Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context.	Express fractions in a common denomination and use this to compare fractions that are similar in value.
Reason about the location of any number up to 10 million, including decimal fractions, in the linear number system, and round numbers, as appropriate, including in contexts.			Solve problems involving ratio relationships.	Compare fractions with different denominators, including fractions greater than 1, using reasoning, and choose between reasoning and common denomination as a comparison strategy
Divide powers of 10, from 1 hundredth to 10 million, into 2, 4, 5 and 10 equal parts, and read scales/number lines with labelled intervals divided into 2, 4, 5 and 10 equal parts			Solve problems with 2 unknowns.
